## One Balloon-Multiple Sizes

Compatible with short-wire techniques, FIT™ SW Stone Balloons inflate from 9mm – 22mm, so you can now perform effective stone removal with one balloon.

### *One Balloon for Any Size Duct*

- Expandable from 9mm-22mm, the FIT balloon adjusts to the caliber of the bile duct
- Helps provide effective occlusion by adjusting size to the desired duct
- Designed to easily accommodate anatomical variations
- Reduces need to exchange devices mid-procedure

### **Did you know?**

**FIT™ is one of, if not the ONLY, short-wire compatible stone balloons currently available that is NOT made with natural rubber latex.**

# Features and Benefits

## Designed to Reduce Resistance & Bursting

- Rugged yet pliable, adjusts to most duct sizes to match the patient anatomy and easily remove stones
- One of the only stone balloons that allows for better visualization due to its transparent material
- Radiopaque marker band for visibility under fluoroscopy

## Dual-Injection Ports Help Reduce Intraductal Pressure

- Choice of proximal or distal injection helps decrease unnecessary contrast injection into hepatic ducts and can help reduce fluoroscopy time with dual injection ports.
