

Colorectal Masterclass: Adopting Low Stable Pressure Clinical Insufflation

📅 27th–28th April 2026

📍 Bordeaux, France

» COURSE OBJECTIVE

Join us for a collaborative masterclass, that incorporates case-based learning and peer-to-peer engagement to learn current practices and trends in colorectal surgery. Participants will analyse procedural standards and variations, identify technical difficulties, and examine evolving strategies and innovations in the field.

» ATTENDEE PROFILE

Anaesthesiologist and/or Colorectal Surgeons experienced in laparoscopic and/or robotic surgery with an interest in adopting low stable pressure clinical insufflation, as part of their routine surgical practice.
