

Gynaecologic Masterclass: Adopting Low Stable Pressure Clinical Insufflation

📅 15th–16th November 2026

📍 Barcelona, Spain

» COURSE OBJECTIVE

This masterclass provides participants with in-depth expertise on AirSeal® clinical insufflation and its pivotal role in low stable pressure surgery. Explore the clinical advantages of reduced intra-abdominal pressure, in synergy with robotic surgery. Attendees will gain front-row access to live surgical demonstrations of both oncologic and benign gynaecologic procedures at the renowned University Hospital of Bellvitge—transforming knowledge into practice through direct observation and expert insight.

» ATTENDEE PROFILE

Anaesthesiologist and/or Gynaecologic Surgeons experienced in laparoscopic and/or robotic surgery with an interest in adopting low stable pressure clinical insufflation, as part of their routine surgical practice.

» PROGRAMME

DAY 1: Sunday 22nd March

LOCATION: Local restaurant, TBC

- 19:00 Arrival at the restaurant and welcome
- 19:15 Finger-food dinner
- 19:30 Description of the AirSeal® platform
- 19:45 Practical examples of AirSeal® use at low pressure
- 20:00 Robotic surgery video forum: techniques, indications, and challenges
- 21:00 End of the day

DAY 2: Monday 23rd March

LOCATION: Bellvitge University Hospital.
Surgical Technical Building, Robotic
Gynaecology Operating Rooms (Third Floor)

- 08:00 Transfer to the Operating Rooms at the University Hospital of Bellvitge
- 08:30 Presentation of the day's surgical cases
- 09:00 Live surgeries (non-stop)
- 13:30 Finger-food lunch at the hospital
- 20:00 End of the day

» FACULTY

Jordi Ponce
Head of Gynaecologic
Department at University
Hospital of Bellvitge

Marc Barahona
Gynaecologic Oncologist and
Robotic Surgeon at University
Hospital of Bellvitge

Sergi Fernández
Gynaecologic Oncologist
at University Hospital
of Bellvitge
