

Thoracic Masterclass:

Adopting Low Stable Pressure Clinical Insufflation

📅 2nd–3rd February 2026

📍 Salamanca, Spain

» COURSE OBJECTIVE

This masterclass provides participants with in-depth expertise on AirSeal® clinical insufflation and its pivotal role in low stable pressure surgery. Explore the clinical advantages of reduced intra-thoracic pressure, in synergy with robotic surgery.

Attendees will gain front-row access to live surgical demonstrations by Dr. Jiménez at the Hospital Clínico Universitario de Salamanca—transforming knowledge into practice through direct observation and expert insight.

» ATTENDEE PROFILE

Anaesthesiologist and/or Thoracic Surgeons with an interest in adopting low stable pressure clinical insufflation, as part of their routine surgical practice.
