

# Continue Your Education with

Explore the latest trends and technologies in Gastroenterology

---

## Continuing Education Just Got Easier...

We know continuing education is a critical part of your nursing responsibilities. We're committed to facilitating a variety of opportunities for you to stay current on the training and skills required for your role. Through education, we can ensure exceptional care.

## EXPLORE OUR SPECIALIZED COURSE OFFERING:

### **Hemostasis: Techniques and Technologies in GI Endoscopy**

(2 Contact Hours)

Causes and treatments of GI bleeding take many forms. This course spotlights different types of upper and lower GI bleeds, and reviews the latest techniques and devices to achieve hemostasis.

#### **Learning Objectives:**

- Understand ways to achieve hemostasis
- Compare types of gastrointestinal (GI) bleeds to potential diagnoses
- Differentiate variceal and nonvariceal bleeding
- Describe hemostasis techniques and technologies used in endoscopy

### **Electrosurgery Basics and Safety in Gastroenterology (1 Contact Hour)**

Electrosurgery is an essential tool for performing Endoscopy. This course will give you an overview of electrosurgical currents and how they can be used to deliver the intended tissue effects.

#### **Learning Objectives:**

- Review the principles of electrosurgery
- Differentiate tissue effects in relation to types of current
- Describe argon plasma coagulation (APC)
- Identify current modes to use in advanced electrosurgery procedures
- Describe best practices in electrosurgical safety for patients and staff

## **Biliary Tract Stenting (1 Contact Hour)**

This course explores the anatomy and pathophysiology of the biliary system and related organs, and the indications associated with stent placement. Additionally, it provides a comprehensive understanding of differentiating between biliary stents and evaluating the advantages and disadvantages of metal and plastic stents.

### **Learning Objectives:**

- Discuss the anatomy and pathophysiology of the biliary system and related organs
- Describe the indications associated with stent placement
- Differentiate between biliary stents
- Identify the advantages and disadvantages of metal and plastic stents

## **Infection Prevention (2 Contact Hours)**

Reprocessing flexible endoscopes to infection control standards is critical to patient safety. This course reviews the latest multisociety guidelines, and steps you can take to reduce the risk of infection transmission at your facility.

### **Learning Objectives:**

- Recognize uses of flexible endoscopes
- Identify steps for processing flexible endoscopes
- Explain the different sterilization modalities and manufacturer's sterilization recommendations for flexible endoscopes
- Discuss society recommendations and best practices for facility infection prevention
