

Beamer AVEO™ System

Warranty & Service Plans – Built for Confidence, Backed by Coverage

So You Can Focus on Care, Not Repair

Precision. Reliability. Peace of mind.

The Beamer AVEO™ Electrosurgical System is designed to deliver consistent, high-performance results in demanding endoscopy procedures. When your equipment performs at its best, so can your team.

Protect your equipment and maintain its quality with CONMED's industry-leading warranty and service options. Whether you are utilizing the full AVEO™ electrosurgical system with argon configuration or using the optional irrigation pump, we have you covered.

STANDARD WARRANTY: INCLUDED AT NO EXTRA COST

Every Beamer AVEO™ purchase comes with a 2-year manufacturer's warranty that ensures your system stays protected from day one.

Your coverage includes:

- Parts and labor
- Software updates
- Factory repairs
- Phone and field support
- Preventative maintenance

Applies to:

- Beamer AVEO™ ESU and Argon module
- Beamer AVEO™ Irrigation Pump

Not included:

- Disposable, single-use argon probes

KEEP YOUR COVERAGE GOING: EXTENDED WARRANTY PLANS

Why stop at two years? Extend your coverage with flexible service plans designed to meet your operational needs and budget. Choose 2, 4, or 6 years of added protection and take the guesswork out of equipment maintenance.

Extended coverage can include:

- Long-term protection for critical components
- Preventive maintenance service after 24 months
- Priority service and loaner equipment
- Regular software and firmware updates

Warranty Extension Options & Item Codes:

- Complete System (ESU & Argon): CE600-EXW2
- ESU only: CE200-EXW2
- Irrigation Pump only: CETEGP100-EXW2
- Distributor SKU: 60-7546-001.

Ask your CONMED representative for pricing based on your preferred coverage length and system configuration.

WHY EXTEND YOUR WARRANTY?

- **Predictable budgeting** — eliminate surprise costs
- **Minimized downtime** — stay productive with priority service and loaners
- **Maximize equipment life** — extend the life and performance of your system
- **Stay compliant** — ensure software updates and calibrations are current
