

Cross-Contamination and Infection Prevention!

Over the past few decades, cross-contamination and infection prevention have become important topics of discussion for hospitals. At CONMED, we also take this topic very seriously. That is why we have created one of the most extensive lines of single-pack ECG electrode options on the market – to enhance patient care.

Whether your goal is to further prevent cross-contamination concerns, reduce waste from bulk pack ECG electrode gel dry-out, or reduce the number of ECG electrode packaging configurations your hospital orders, **CONMED has you covered with our single-pack ECG options!**

Suretrace®
SINGLE PACKS

Minimize Risk

Also available in single-packs: Cleartrace™ 2 - Invisatrace® - Suretrace® - Exactrace® - Dynatrace® - Huggables®

- Find additional Instructions-for-Use online at:
