Ablation

CONMED has the Edge®

EDGE® PROBES

Edge® Bipolar Arthroscopic RF System (AES-1)

Offers a wide range of performance benefits ranging from optimized power settings to joint temperature monitoring. The Edge® System delivers efficient and effective resection, ablation, and coagulation performance across all disciplines. The strong and stable plasma field efficiently and effectively removes tissue debris that can impair a surgeon's field of view. Bubbles are effectively removed by the optimized suction slot in the electrode. The edge of the large non embedded electrode can be used for sculpting and fine tuning with maximum control.

Benefits

- Plug & play performance
- Faster bulk tissue ablation with less risk
- Blade and sculpt with one versatile probe
- Real-time intraarticular joint temperature monitoring

Fluid Management

Focus on the Patient, not the Pump

ECO-FLOW™ TUBING

CrystalView® Pro Fluid Management System (CV4000)

Combines high performance inflow and outflow for optimal distension and clear visualization with intuitive features and customizable surgeon presets to help simplify the OR. CrystalView™ Pro is designed to let you focus on your patient, not on the pump.

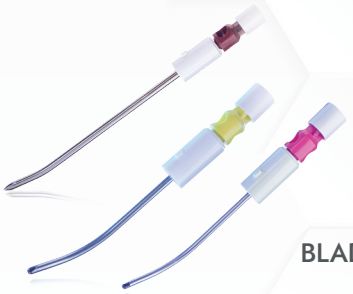

Benefits

- Plug & play joint preset
- Simple & intuitive touch screen
- Reliable fluid management
- Programmable surgeon settings

Resection

BLADES

Arthroscopic Resection System (D4000A)

CONMED's next generation of powered instrument consoles for arthroscopic resection, the D4000A has intuitive features that deliver new levels of simplicity, versatility, and performance. It supports 31 handpieces including CONMED Shavers and Hall® Power Tools.

Benefits

- Plug & play performance
- All joints in one hand piece
- All your blade & bur requirements

Looking Glass®

The Performance You Want, the Durability You Need.

Integrated Surgical Visualization System (AV4132)

Has a new look and feel compared to traditional monitors. Remember this is not just a monitor, it's an integrated system housing the camera controller and power source. MAGIC is in the monitor.

Touch Glass Image Capture (AV41SIC)

Touch Glass is designed to be scalable, giving you options for functionality and cost.

CAMERA HEAD

ELUMA™

Benefits

- 4K Ultra-High Definition (UHD) image quality
- Plug & play performance
- Reduced OR footprint
- Ultra durable eLuma™ electronic light guide (ELG)

Ordering Information

RESECTION

Description	Qty	Catalog No.
Consoles		
D4000 Drive System	1	D4000
D4000A Drive System with Irrigation	1	D4000A
Blades and Burs		
Stealth™ Diamond-Like Carbon (DLC) Coated Blades	1	SDPS-C002
Lanza™ Tapered Speciality Shaver Blades	1	9391A
Mimix™ Small Joint Blades and Burs	1	LE-29FRP
Signature Series™ Blades and Burs	1	HPS-C001
Ultra Series™ Dual Purpose Shaver Blades	1	DPS-C001
Standard Blades and Burs	1	HPS-CB01
Handpieces		
Ergo™ 2-Buttons Shaver Handpiece	1	D4240
Ergo™ No-Button Shaver Handpiece	1	D4200
Foot Pedal	1	C9863

ABLATION

Description	Qty	Catalog No.
Consoles		
Arthroscopic Energy System	1	AES-1
Probes		
Arthroscopic Energy 90° Probe with Suction	1	AES-90SN
Arthroscopic Energy 50° Probe with Suction	1	AES-50S
Arthroscopic Energy 30° Probe	1	AES-30
Arthroscopic Energy 90° Probe with Suction, Extended Length	1	AES-90SL
Arthroscopic Energy 50° Probe with Suction, Extended Length	1	AES-50SL
Arthroscopic Energy Straight Hook Probe	1	AES-HK00
Arthroscopic Energy 20° Hook Probe	1	AES-HK20

FLUID MANAGEMENT

Description	Qty	Catalog No.
Pumps		
CrystalView™ Pro Fluid Management System	1	CV4000
CrystalView™ Pro Remote	1	CV4040
10K Pump	1	10K
24K Pump	1	24K
Tubing		
EcoFlow™ Day-Use Pump Inflow Tube Set	1	10K600
EcoFlow™ Single-Use Patient Inflow Tube Set	1	10K605
Inflow-Only Tube Set	1	10K100
Inflow-Only Tube Set with Suction Tube	1	10K150
Outflow, Shaver Suction Tube Set	1	24K100
Puddlevac™ Floor Suction Device	1	9321
