

CrossFT[®]

Suture Anchors

**Consistent Fixation.
Expanded Options.**
Scan for more information.

Imagine what we could do together.

CrossFT® Anchor

Dual-Thread Fixation for Primary and Medial Row Repair

The CrossFT® platform features PEEK and GENESYS™ biocomposite fully threaded anchors with cortical and cancellous thread profiles designed to provide strong fixation across varying bone qualities.

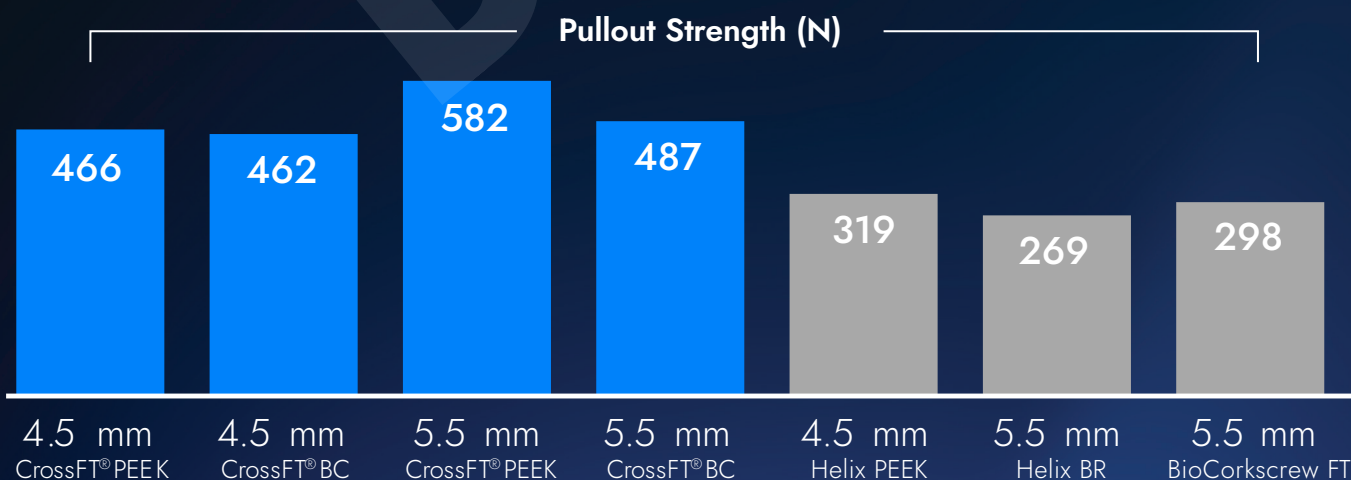

Fully Threaded Design for Confident Anchor Stability

Built to hold firm and resist migration during repair.

Confident Fixation

The CrossFT® anchor system provides superior fixation strength compared to competitive anchors. ^{1,2,3,4}

CrossFT® GENESYS™ demonstrated **47%** higher pull-out strength compared to competitive systems.^{1,2}
 CrossFT® PEEK demonstrated **20%** higher pull-out strength compared to competitive systems.^{1,2,3}

Imagine what we could do together.

Options for Every Preference

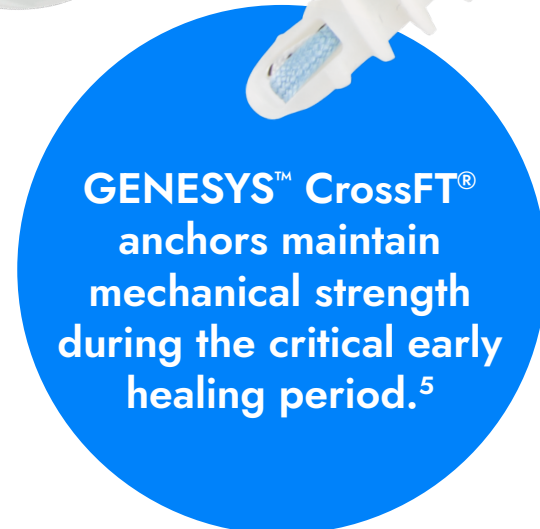

A single anchor platform offering PEEK and GENESYS™ biocomposite materials with double or triple-loaded #2 Hi-Fi® suture and 1.3 mm Hi-Fi® Ribbon options, enabling tailored constructs without changing technique.

CrossFT® with needles for open or mini-open procedures

GENESYS™ CrossFT®
Biocomposite material with #2 Hi-Fi® suture and 1.3 mm Hi-Fi® Ribbon

GENESYS™ CrossFT®
anchors maintain mechanical strength during the critical early healing period.⁵

CrossFT® PEEK radiolucent, non-resorbable polymer with #2 Hi-Fi® suture

Imagine what we could do together.

Consistent Fixation. Expanded Options.

GENESYS™ CrossFT® with Hi-Fi®
Ribbon for broader compression and
expanded procedural flexibility.

Broader Compression

At twice the width of #2 suture, 1.3 mm Hi-Fi® Ribbon is designed to increase tendon-to-bone contact, improve load distribution, and support smooth sliding knot performance.

Low-Profile Knots

Hi-Fi® Ribbon creates smaller knot stacks than #2 suture, helping reduce abrasion and post-operative discomfort associated with larger knots.⁶

Strength You Can Trust

Hi-Fi® Ribbon is 14% stronger than #2 suture for added confidence and control, while GENESYS™ material with microTCP™ is engineered to enhance anchor strength by up to 51%.^{7,8}

Imagine what we could do together.

CrossFT® Tap

CrossFT® Punch

CrossFT®
Universal Punch⁸

Streamlined Instrumentation

Broaches and taps available in
4.5, 5.5, and 6.5 mm sizes with
color-coded handles for
easy identification.

Imagine what we could do together.
