

Paradigm™ Curved Knot Pusher

Now available for hip arthroscopy procedures.

New for hip, the Paradigm™ Curved Knot Pusher is designed to simplify and streamline difficult hip arthroscopy procedures and facilitate knot tying in challenging anatomy.

Features and Benefits

Innovative

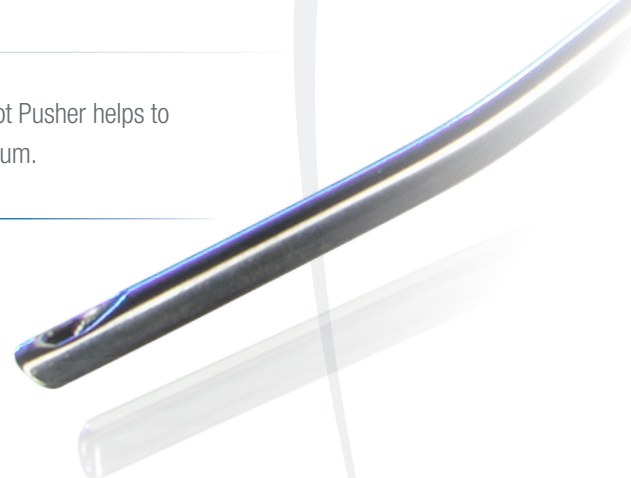

The First of Its Kind – The Paradigm™ Curved Knot Pusher is currently the only curved knot pusher available¹ that is specifically designed for the hip anatomy.

Easy

Anatomic Curve Design – With the hip in mind, the Paradigm™ Curved Knot Pusher features an anatomic curve design that's intended to simplify knot tying in hard to reach places.

Optimal Knot Stack Placement

Enables Precise Placement – The Paradigm™ Curved Knot Pusher helps to enable precise placement of the knot stack around the labrum.

To help simplify your next hip procedure, call your CONMED Sales Representative at **1-866-4CONMED** or visit **www.CONMED.com**

¹ Compared to other large hip arthroscopy companies.
