

Paradigm™ Suture Passing

Part of CONMED's innovative Paradigm™ Hip System, the Slim Raven™ Suture Passer and Slim™ Suture Retriever have been designed by some of the world's leading hip surgeons to provide simple and precise suture passing specifically for the challenging anatomy of the hip.

Features and Benefits

Paradigm™ Slim Raven™ Suture Passer

For traditional suture passing, the Slim Raven™ Suture Passer's sharp tip and low-profile jaws easily pass and retrieve suture with minimal disruption to the labrum, which may help preserve tissue. The 15° upward angle provides accurate suture passing in the tight hip joint.

Paradigm™ Slim™ Suture Retriever

Allowing the sutures to easily slide through the jaws for effective retrieval, this manual suture retrieving device features a 15° upward angle that provides accurate suture passing in the tight hip joint.

Experience the Paradigm shift. Take the next step toward simple, safe, and efficient hip arthroscopy. Call **1-866-4CONMED** or visit www.CONMED.com/Paradigm to learn more.
